

CTP Registronic Inline Punch

Description:

The Registronic Inline Punch forms part of a complete inline CTP system to avoid manual plate handling. For use with CTP machines supplied without a punch system or where the system is not compatible with the existing register system.

Features:

- Fully automatic
- Choice of edge detection or vision control
- Punches and dies made from hardened steel
- Positional accuracy +/- 0.01mm
- Automatic punching
- Plates outside tolerances are automatically rejected
- Virtually maintenance free
- Billows Protocol warranty
