

## PCB Post Etch Punch

### Description:

The Billows Protocol Post Etch Punch can be manufactured with the standard 4-slot tooling or with punching tools to suit any configuration. The Post Etch punch uses the latest high resolution cameras combined with our award winning vision software. The combination of the vision system and our punching expertise gained over 40 year provides our customers with an accurate, reliable and cost-effective machine.

### Features:

- Advanced vision system for error free registration
- Fully automatic operation
- Pneumatic system for punching
- User friendly touch screen controls
- Punches and dies made from hardened tool steel
- Punches in fixed positions to avoid movement errors
- Large waste tray
- Virtually maintenance free
- Billows Protocol warranty
